Plant-based Protein

Welcome to join the international discussions on January 13 about plant-based protein for healthy food in the Baltic Sea Region!

The future of plant-based protein is dependent on collaboration and development of all parts in the food value chain. How do we achieve that? What are the biggest challenges today and what can we do to speed up the transformation?

We invite you to participate in this half-day digital discussion with companies, institutes and universities in the Baltic Sea Region who are at the forefront of the plant-based transformation.

To register email: matilda.e.persson@ri.se

9.00-9.50 Inspirational talks from industry and researchers

9.50-10.20 Panel discussion 1- Primary production

10.30-11.00 Panel discussion 2- Processing and Product development

11.05-11.35 Panel discussion 3- Consumer behavior and communication

11.35-11.45 Wrap up

Interreg Baltic Sea Region
